

PMA-2010AE

Integrated amplifier with the fruit of many years of Denon audio technology and experience. To further improve expressiveness in sound, the PMA-2010AE inherits the UHC-MOS Single Push-Pull output circuit and is of a newly-engineered construction, forming a solid foundation for a pure, clean sound. The PMA-2010AE is an integrated amp that emulates high-end models in both elegance and sound quality.

PMA-1510AE

The PMA-1510AE is endowed with a renowned Denon tradition: the simple & straight UHC-MOS single push-pull amplifier circuit. Amplifier construction, the foundation of expressive sound, has also been redesigned to place greater emphasis on low specific gravity and more direct grounding. Rich musical expressiveness in a class of its own is achieved with the same large, 27-mm motor-driven volume control that's used on the high-class PMA-2010AE.

DCD-2010AE

The DCD-2010AE is endowed with Advanced AL32 Processing, a highly accurate master clock and latest 32Bit/192 kHz DA converters that dramatically boost the quantity of digital audio information to ensure that the sound you hear is more faithful to the original source. The newly designed Advanced S.V.H. drive mechanism guarantees accurate, quiet and high quality playback of SACDs and CDs. The DCD-2010AE is equipped with various digital input ports, including a USB port for connecting an iPod or USB memory and playing music files from those devices. When these digital signals are played back through Compressed Audio Restorer, Advanced AL32 Processor and other Denon audio circuits designed for high sound quality, you will be able to enjoy the music with a rich ambiance not possible from those devices on their own.

DCD-1510AE

The DCD-1510AE features the same Advanced AL32 Processing of Denon's high-class DCD-2010AE. This technology dramatically enhances information volume from the CD to produce a sound more faithful to the original. The DCD-1510AE also has a USB port for directly receiving digital tracks stored on an iPod or USB memory. When digital audio signals are input from an external device, they pass through Advanced AL32 Processing and other circuits developed by Denon to maximise sound quality, allowing you to experience a depth of sound not possible with the portable audio device by itself.

DCD-1510AE Super Audio CD Player
PMA-1510AE Integrated Amplifier

PMA-1510AE Integrated Amplifier | DCD-1510AE Super Audio CD Player // Once again, more than 50 experts of the renowned EISA jury gave their vote to a Denon product. This time, they even awarded two at once. EISA jury, let's hear your verdict: "Only just released, this combination of SACD player and integrated amplifier sets new standards in the mid-priced market." The PMA-1510AE is endowed with a wide-range of unique Denon technologies to achieve rich musical expressiveness. His congenial partner, the DCD-1510AE, inherits many features from reference class models and "redefines performance at this price". (EISA).

 "There can be few more imposing stereo amplifiers at this kind of money than the PMA-2010AE." "This amp is not short of enthusiasm, meaning it works well with the partnering disc player, the easy-going DCD-2010AE." (What Hi-Fi)

 "The DCD-1510AE produces a very smooth refined sound – detailed and crisp, yet well-balanced and clean." "The PMA-1510AE produces a solid, focused no-nonsense sound that immediately impresses with its cleanness and immediacy." "... these Denon components offer high performance and outstanding value." (Hi-Fi Choice)

 The evolution of sound. Denon's PMA series has a brilliant reputation among audiophiles. The newest model is a worthy representative of this heritage and even becomes a new all-round talent. (Audio Test)

Excellent D/A converter, high-class audio experience and exemplary values. With its new SACD player, Denon brought D/A conversion to perfection and lets you enjoy the full quality from your existing music library no matter which format. (Audio Test)

 The precursor DCD-1500AE was already in a class of its own, but the new DCD-1510AE shows him the backlights. He plays even more lively, balanced, fresh and powerful.

Denon achieved to upgrade the existing PMA-1500AE once again. The PMA-1510AE sounds even more colourful and dynamic with a more precise bass fundament. (Stereo)

 Denon possesses a remarkable expertise in digital technology, and has always proved it. the DCD-2010AE proposes a very persuasive performance in a well-developed construction, worth to the reputation of DENON historical products. (Haute Fidélité)

 Denon's 2010AE components can be recommended even more than their predecessors. Advanced player functionalities and solid Japanese construction are strong arguments which will certainly help you to decide for a purchase. (Audio-Video)

 Citation of Oscar Wilde: „... as far as you always must content only the best“ (Stereo & Video)

 Do you think excellent systems can be improved? Denon's attempt had certainly succeeded. The improvement has allowed the player to add a mature version of the sound, analog feeling and improved the resolution. Our hot recommendation. (Audio-Video)

 Our new reference and standard; fine sound details and excellent space definition. The end of discussions about „cold“ digital sound due to 32 bit technology (Stereo&Video)

ALTA FIDELIDAD

 Brilliant design, superb construction and a performance similar to that of European and US High End devices of a more exquisite class. A combination that makes them a hard to resist option, especially considering their advantageous price. (Alta Fidelidad)

ALTA FIDELIDAD

 ...the DCD-1510AE and PMA-1510AE combination is a fitting representative of a lineage born for the greater glory of traditional sound reproduction. The system is efficient in all respects, beautifully designed, perfectly constructed and features endless sound possibilities. All in all, real democratic High End. (Alta Fidelidad)
