

## PRESS INFORMATION

Small size, great sound.

New Denon D-M40 continues famous legacy of Europe's most wanted Micro Hi-Fi System

April 7<sup>th</sup>, 2015 – Denon, one of the world's leading manufacturers of high-quality home entertainment products, is pleased to announce a further advancement of Europe's most wanted Micro Hi-Fi System. Stepping into the footprints of multi-award winning D-M39, the new D-M40 features serious Hi-Fi quality CD Receiver RCD-M40 along with optimized two-way speaker system SC-M40. For almost 20 years now, Denon's M Series has been developed to meet the needs of modern day audio enthusiast that want a micro size stereo system but with the least compromises on sound and build quality. The latest development comes with improved connectivity options such as two digital optical inputs to hook up a TV, set-top box or other digital gear that deserves improved audio quality. Besides its stunning stereo sound performance, the D-M40's USB port is not only capable of playing MP3 and WMA files, but also lossless FLAC, WAV and AAC. Moreover, it still provides a digitally transmitted play function for iDevices, upgrading the sound from these mobile devices dramatically. For very personal listening, the new D-M40 owns an upgraded headphone amplifier section with dedicated Gain Control.

The compact size of 210mm width and just 310mm depth (plus speakers) allows for an easy setup of the D-M40 on a bookshelf, in a bedroom or in the home office. With several colour combinations, it easily blends into people's daily life, delivering impeccable performance at the same time. The renowned sound quality originates from Denon's "simple & straight" concept. All circuits are uncomplicated, signal paths are short, and all adverse influences on the sound signal have been minimized. The circuit design and the way the chassis is built ensure that the sound heard is utterly faithful to the original performance.

The new D-M40 combines high-quality sound with beautiful appearance. The system will be available from June onwards in an attractive black or silver finish for RCD-M40, in combination with SC-M40 speakers in black or cherry wood. In selected countries, there will be DAB/DAB+ tuner versions available in store. For more information visit [www.denon.eu](http://www.denon.eu).
