

EISA awards HEOS the best Multiroom System 2015-2016:
"HEOS by Denon provides all the components needed to piece together a versatile sound system for your home."

Eindhoven, August 17th, 2015 - Denon, one of the world's leading manufacturers of high-quality home entertainment products, is delighted to receive this year's most prestigious EISA Award for the HEOS wireless multiroom system. HEOS brings Denon-quality audio to any room in your home. The range of four elegantly designed, compact yet hugely powerful wireless speakers, deliver your favourite music from the world's leading online music services, "legacy" music sources in the home, smart devices, as well as PCs, Macs or NAS drives on your home network, to the rooms you want to hear the music. Beautifully styled and available in black or white, complemented by brushed metal accents, the range is enhanced by an optional range extender that improves and expands the user's existing home wireless network (sold separately). The whole HEOS system can simply be controlled by a single, slick, state-of-the-art app, available for Apple, Android and Kindle Fire devices, that allows the system to be set up incredibly easily.

The European Imaging and Sound Association (EISA) is the unique gathering of more than 50 special interest magazines from nearly 20 European countries forming the world's most prestigious multimedia magazines association. Every year, the EISA Awards applaud the new products that combine the most advanced technology, the most desirable features, the ultimate expression of design, the most satisfying ergonomics and the greatest value for money.

Read the award citation of the EISA jury:

"HEOS by Denon provides all the components needed to piece together a versatile sound system for your home. Loudspeakers come in a variety of models - the HEOS 1, 3, 5 and 7 - while partnering separates extend to the impressively versatile HEOS Amp and HEOS Link preamp. The HEOS HomeCinema is perfect for placing under your screen as a soundbar, while the HEOS Extend is an ideal way to increase the reach of your Wi-Fi for elegant wire-free music. The entire system is configured and driven by the intuitive HEOS app (iOS and Android), while Spotify, Deezer, Tidal, Soundcloud, Rdio, and TuneIn radio are just some of the integrated music services on offer. Capable of a surprisingly deep bass, a well-judged midrange and room-filling energy, this is the perfect way to spread stunning sonics throughout the house."

The EISA award shows that Denon truly sets the bar high with their HEOS by Denon system. Learn more about all of the products in the HEOS by Denon family here: www.denon.eu
